

For Immediate Release

COSOL Appoints New Managing Director, Scott McGowan

Brisbane, 30 July 2019: The Board of Directors of COSOL is pleased to announce the appointment of a new Managing Director, Scott McGowan.

“Scott has been COSOL’s CEO since 2016 and has since steadily lead the organisation and seen it grow from strength to strength. During this time COSOL has experienced rapid growth in numbers and performance. Scott worked with us for over 12 years commencing in a consulting role and progressing through to managing our Eastern Australian region, managed our business development globally and then taken on the mammoth role of CEO”. said Greg Wood, Chairperson of COSOL Board.

Scott commented “I am excited to take on the role of Managing Director and contribute to the COSOL Board of Directors. My career to date has allowed me to gain valuable insight and experience into what is required to steer the ‘ship’ steady in the face of adversity and rapid growth. We now have solid foundations in place to help us continue growing the business through organic and inorganic growth, as well as product innovation, to reach new clients and markets. I look forward to the next chapter and taking COSOL to new heights!”.

Scott is extremely well qualified and experienced to lead and guide the COSOL brand with continued success into the future. Scott’s strong technical and business qualifications, and an impressive track record of hands-on experience in strategic planning, business unit development, project management, product development and system engineering strategies will provide the next level of executive guidance to support COSOL’s rapid expansion.

Please join us in welcoming Scott to his new position with COSOL.

END

About COSOL

COSOL is a global, professional service provider, specialising in providing strategic advice and practical delivery to optimise clients’ business processes and technology systems. COSOL specialists have a valuable combination of asset intensive industry experience and technology systems expertise, enabling our teams to strategically plan, design, deliver and optimise operational and enterprise systems, continually optimise business processes, and efficiently solve the most complex issues.
